

AI Supplier Ranking Agent

Student: Hetvi Sheth
Department: Computer Science Engineering
Institute: Navrachana University

Abstract

This project focuses on supplier evaluation using AI-based scoring techniques.

Regression models were trained using real-time web-scraped data.

A custom verification algorithm improved supplier ranking reliability.

The solution was appreciated during a hackathon by the CEO of Mesh Works.

The system aimed to automate supplier comparison and decision-making.

Technologies Used

Technology Stack
Python, Regression Models, Web Scraping

Future Scope

This project can be extended with advanced AI models, cloud deployment, real-time scalability, and improved datasets for better accuracy and performance.

Conclusion

The project demonstrates practical implementation of AI, machine learning, or software technologies to solve real-world problems effectively.
